STAINLESS STEEL PIPE FITTINGS

We are the best manufacturer and vendors of stainless steel pipe fittings. The pipe fittings needs to be in accurate dimension to avoid any kind of leakage problem in the pipe. These fittings are made as per the industry standards norms.

They are prepared from optimum grade stainless steel to provide top quality and durability.

STAINLESS STEEL FITTINGS

The fittings we offer are made from highest grade stainless steel materials. We offer number of SS fittings like pipe fitting blend, butt welded tee, eccentric reducer, concentric reducer and pipe holding clamp. They are offered in different size and specifications to suit the requirement of the client's application area. The [stainless steel fittings](#) we present are famous among the clients for their accurate dimension and durability.

SS BUTTERFLY VALVE

The butterfly valve has a disc and a shaft and the axis of rotation is according to the flow direction. They are made using advanced technology and best grade stainless steel. The dimensions are kept as per the standards defined and are even modified on customer request. The SS butterfly valve is used in industries like breweries, chemical, cosmetic, dairy and food processing.

WATER LOOP SYSTEM

The water loop system is used to transfer the heat from the heat emitting element to the cooling zone. This helps in cooling down the system that generally tends to get heated in the execution of any process.

We offer the water loop system in various dimensions according to the needs of the plant. These systems are made from best quality materials to suit the needs and handle the high temperature.

FITTINGS FOR ERECTION OF PIPING

To make the pipes erect there are number of fittings that are available with us. We are the leading manufacturer of fittings for erection of piping. The shape and size of the fitting must be accurate to completely fit the location and the pipe. This helps in erecting the pipe so that they stand firm in the designated position. We offer them in the most affordable and economic price range.
